As part of the France-Brazil Year, Guillaumit completed an artistic residency in 2025 in Manaus and São Paulo (Brazil). MosaicAmazonia, an augmented reality creation, is based on natural elements collected in the Manaus region: river water, painting tools made in the forest, botanical observations, etc. Leaves, stems and roots are transformed into a paper mosaic combining drawing, craftsmanship and digital animation.

MosaicAmazonia offers a visual exploration of the Amazon, at the crossroads of nature, gesture and technology.

Guillaumit is an author of comic strips and children's books, a creator of animated films and a multi-disciplinary artist whose universe is imbued with historical themes (folklore from all over the world) and constant questioning of new technological tools.
